

## Job Description

<b>Post</b>	Home Automation Technician
<b>Tenure</b>	Full time
<b>Salary</b>	Negotiable per hour
<b>Location</b>	London
<b>Reports to</b>	CEO
<b>Start date</b>	As soon as possible

### Overview:

This key role is aimed at enhancing the technical activities of the business. The principal purpose is to support the engineering team in the maintenance and installation of automation and security systems.

### Key Duties:

- Provide support in for the maintenance and installation of TV and satellite systems
- Work with the engineering team in delivering and maintaining automation systems, such as lighting and AV control
- Support the engineering team in the set up of IT systems and networks
- Assist with the installation of security systems
- Help with setting up AV and network racks
- Provide technical support to clients over the phone or online
- Prepare engineering reports for the management team

### Key Skills:

- Experience in the setting up and maintenance of TV and satellite systems
- Proficient in lighting and AV control software programming
- Good experience with network and IT systems, particularly is the setting up of network switches, routers, and firewalls
- Familiarity with Ubiquiti Unifi would be beneficial
- Experience in the setting up, installation and maintenance of CCTV and NVR systems
- Knowledge in setting up AV and network racks

### Qualifications:

The position is available to those with a technical background with suitable qualifications from the engineering or computing domain, preferably with either a BTEC, national diploma, undergraduate degree or equivalent certifications. A valid, clean UK driving license is also required.

### Person Specification:

This role is ideally suited to creative and innovative thinkers who enjoy on-site technical installation and maintenance work. The Home Automation Technician will work collaboratively with the

engineering team in the delivery of automation and security installation projects, and assist with the maintenance of such systems where required. The post holder will require good technical and organisational skills with a capability to problem solve, matched with the ability to effectively communicate with team members and clients.

#### Performance indicators:

- Quality and delivery of technical work
- Punctuality
- Team work
- Response to management
- Organisation
